## PROFESSIONAL EXPERIENCE

### **Bukooh— *Founder***

January 2019 - July 2019

Bukooh helps reduce the waste of books in Nigeria University most specifically University of Ibadan. The project was discontinued after some months for some major reasons.

### **CloudWare— *Full Stack Developer***

April 2020 - May 2020

I developed scalable web apps and interfaces using HTML, CSS, and PHP. I helped speed up the time it took to take the product to market

## VOLUNTEER EXPERIENCE

### **Code Gear— *Web Development***

October 2019 - February 2020

Gave lectures on Web Technologies such as HTML, CSS, and JavaScript in a web development bootcamp specifically designed for the engineering students of the University of Ibadan.

### **Andela Learning Community — *Android Development***

May 2019 – August 2020

Volunteered as a meetup facilitator, helping to train over fifty beginners in web programming.

## PERSONAL DEVELOPMENT PROJECTS:

- **Oga-Tailor:** An app(Web/IOS/Android) that connects tailors with clients that also eliminates the need for tailor to use biro and paper when taking client measurements.

**Technologies:** React, Ionic, Firebase

- **Microsoft-TodoList-Clone:** This is a replicate of the official Microsoft todolist app both available on IOS and Android.

**Technologies:** React Native, Expo

- **Bukooh:** Bukooh gives books users the opportunity to give out the books they are no longer using by connecting them with those that needs the books

**Technologies:** NodeJS, Express, HTML, CSS, Bootstrap, MongoDB

- **Instud:** Got this idea from discord. This is an app that connects instructors with students. Instructors can bill students before they gain access to their courses and can also organize tests. This project is presently in active development

**Technologies:** NodeJS, GraphQL, React, Apollo, PostgreSQL

## OTHER PROJECTS

Most of my projects can be found on myGithub account: <https://github.com/Babatunde50>
